

Great app for watching anime	
Background Context: Anime sites could have better GUI's and less ads.	Countermeasures: Design a mobile application that provides a platform focused on using different anime sources to watch free anime. Without ads
Current State: A great anime website was recently lost, so something could be done about this using the app mangareader as an example.	
Objectives: - Create an effective way of communicating with those who want to help those in need. - Ensure that those who wish to help have a way to know what items the affected are in need of and avoid wasting effort by giving items that are in stock in the refugee camps.	
Root Cause Analysis: Why so many bad anime websites and few free anime watching apps? Not with anime viewer	Impact: Create a great app for watching free anime with a vast anime repertoire, something that does not exist currently
	Follow-Up: Add many anime sources with as time passes by and have a very smooth and intuitive GUI.
